PLEASE READ CAREFULLY BEFORE ORDERING

FOR over 65 years, on 240 acres, we at Griffing Nurseries, have strived to maintain good-will with our customers. We think that our volume of business through the years has been the result of this policy. We earnestly desire and request that you phone or write us should our services or materials fail to meet your expectations.

This price listing supersedes and cancels all outstanding prices of previous catalogues and sales lists.

Cash payment must accompany each order. All deliveries are payable in full at the time of delivery.

All orders are final and not subject to cancellation, except that they shall be void should injury befall the stock.

We give no guarantee, expressed or implied, as to the life or productiveness of our stock. Every effort is made to keep the plant material true to name, healthy, and in a vigorous growing condition. However, in no case shall we be liable for any amount greater than the purchase price.

We offer a free delivery on all orders that constitute a truck-trailer load (30,000 pounds). Estimated weights of all trees and shrubs are listed in this catalogue to help you determine if an order amounts to a trailer load. For less than trailer loads, we can deliver via our trucks or by common carrier. Delivery prices quoted upon request. For common carrier deliveries, all shipments are made from Beaumont, Texas. We will ship either by a carrier of your own choosing or the one we consider the fastest and most economical. Complaints regarding condition of plant material caused en route will be given immediate and careful consideration. **BE SURE TO HAVE EXCEPTIONS FOR DAMAGE NOTED ON TRANS-**

PORTATION RECEIPT AT THE TIME OF DELIVERY. All claims must be made not later than five (5) days after receipt of shipment.

No charge will be made for deliveries (provided we select the time of delivery) to: Beaumont, Port Arthur, Port Acres, Port Neches, Nederland, Vidor, Silsbee, Kountze, and Orange, Texas.

This catalogue lists only the plant material which we have on hand in quantity. If you do not find what you want listed here, please write us. We have a number of fine specimen shrubs and trees available, some of which are to be found nowhere else in this country. If we do not have what you wish, we will make every reasonable attempt to secure it for you.

Our Landscape Department is headed by Mr. Joseph D. Zachariah, who, by education and many years of experience, is competently and thoroughly qualified to prepare landscape plans of any size and character, both traditional and contemporary. In the event of planting a new home or reworking an old one, regardless of its size or style, we strongly urge that you give careful consideration to having a landscape plan prepared prior to the actual planting. In this way, many costly errors are eliminated, and the resultant picture is one that has been professionally planned. You are invited to phone or write for this service. Naturally, this does not constitute any obligation on your part.

No discounts are allowed from the prices listed herein except for the following: schools, churches, civic projects, and subdivision developers. Details will be supplied upon request.

Prices and terms of sale as outlined in this catalogue are subject to change without notice.

ELAEAGNUS

BROADLEAF

Elaeagnus pungens macrophylla

Leaves are large and pointed, dark green on the upper surface, new growth and under surface are bright and silvery. Stems are fawn colored. Small whitish flowers, very fragrant. Followed by edible silvery red fruit. Evergreen.

DWARF THORNY

E. pungens nana

Semi-spreading compact habit. This variety, when sheared, makes a wide spreading evergreen growth.

FRUITLAND

E. pungens fruitlandi

Very similar to Broadleaf, except for a more open, weeping growth.

GRIFFING'S COMPACT

E. Griffing's hort. var.

A sport of the Fruitland discovered by us in 1934. Preferred to all other varieties of *Elaeagnus* by many customers and landscape men because of its close compact, attractive growth. Semi-spreading compact habit, leaves of medium size and quantities of small branches make it very attractive and good for clipped hedges or specimens. Withstands drought.

SIMON

E. pungens simoni

Compact, bushy habit. Small, dark green leaves, dotted with silvery scales on upper surface, and silver-white underneath. Young foliage and stems add attractiveness with their fawn colorings.

DID YOU KNOW

A tree located to shade the wall and roof in the afternoon will keep house temperatures more comfortable, may reduce the wall and roof temperatures by as much as 20 to 40 degrees Fahrenheit.

+ + +

Money does grow on trees. When a homeowner moves into a new home he will find, over a period of years, that his home, furnishings, and car all depreciate in value as time goes by. However, his trees and shrubs INCREASE in value. Then, too, good planting and landscaping are so important that they can not be measured solely in dollars and cents.

+ + +

A survey of real estate operators averaged the increased valuation over the unlandscaped place as 12.9%. This means that in addition to a keen enjoyment of beauty in a well-landscaped home, your property increases 12.9% in value.
